Quorum Barbera Asti 2003

Vintage 2003 has been characterised by a long summer, with very few rainfalls and we registered temperatures higher than average ones.

It was very important the running of the vineyards, we worked deeply in ground to avoid the water stress, 5 weeks before the harvest we reduced the yield per vine low to 1000 gr, as to eliminate the thinning out during the maturation of the bounces: doing so, the leaves protected the bounces from the direct sun rays and allowed the maturation to proceed regularly.

The harvest took place in the first 10 days of September, advanced of about 3 weeks, if compared to classic time of harvesting; the bounces were perfectly ripe, the skins were quite thick and showed balanced analytical data.

Our hard work on the vineyards gave us a Barbera of an extraordinary complexity, with very fresh fruit aromas.

His taste is full, very rich and balanced, extraordinary length: it will be a Quorum with a great longevity.
